

DIE HARD CHRISTMAS ORNAMENT

YOU WILL NEED:

- Ornament Template
- Aluminum Foil
- Glue
- Scissors
- A piece of wire
- Something pointy to poke a hole

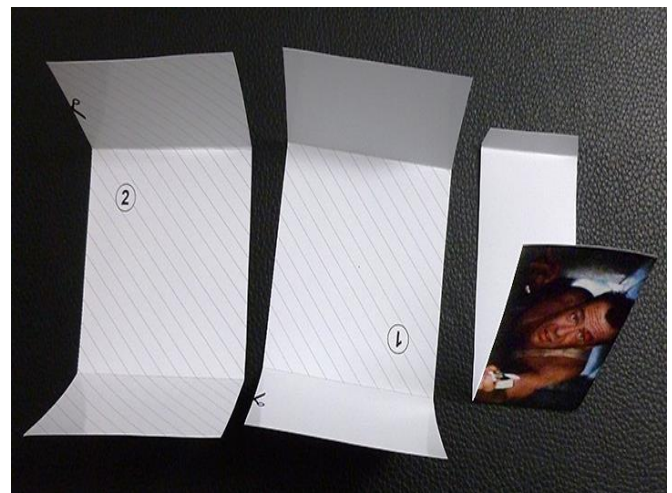

STEP ONE:

Cut the template along the dotted lines. Trim off the borders and cut out the images of John McClane (do not separate the pictures)

STEP TWO:

Fold the pieces along the solid lines. Then poke a hole in the center of the piece labeled 1. This is for the ornament hook.

STEP THREE:

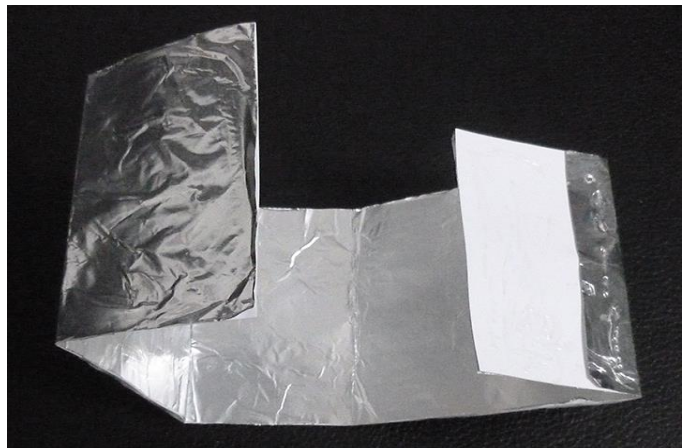

Cover the inside middle portion of piece 1 with aluminum foil. Cover the entire inside of piece 2 with aluminum foil. Repoke the hole in piece 1.

Flip each piece around and do the opposite- cover the inside middle portion of piece 2 with aluminum foil and the entire outside of piece 1 with aluminum foil. At this point you should have two pieces of the cube with two blank sides to glue together.

STEP FOUR:

Repoke hole in piece one if needed and then begin to glue the side parts that aren't covered in foil together.

STEP FIVE:

Glue the John Mclane photos together using the inner white tab. Once glued, insert into the finished air duct.
